

CERTIFIED LOWLINE BEEF FROM URILA LOWLINES

Urila's experience of over 18 years of Lowline breeding and beef production includes:

- Selling CLB carcasses to our the local butcher, Balnarring Village Meats

See ALCA Journal 2015 No.27, p.20-23 – 'Savour the Lowline flavour'

- Selling weaner steers and heifers locally for growing-out on lush green pasture, they are then sold through the local butcher.

- Carcase competitions – a basis to know the quality of the beef, guiding breeding and grazing management.

We appreciate the consumer trend to know more about their food and who produces it. In supporting this sentiment we also benefit from developing a local network.

We sell CLB qualified Australian Lowline cattle for growing on by others, for them to market the beef. As well we grow-on some of our animals, selling their carcasses to our local butcher.

Urila Lowline CLB production is seasonal. If we do not have animals available we happily forward enquiries on to other CLB producers.
